REQUEST FOR CORRECTED PATENT OR  
CERTIFICATE OF CORRECTION BASED ON PATENT OFFICE  
MISTAKE PURSUANT TO 35 U.S.C. §254

APPLICANT(S): Heinrich Jürgensen      CONFIRMATION NO.: 5122  
SERIAL NO.: 09/786,742      GROUP ART UNIT: 2828  
FILED: September 14, 2001      EXAMINER: James A. Menefee  
PATENT NO.: 6,888,853 *B1*      ISSUED: May 3, 2005  
TITLE: "LASER RADIATION SOURCE"

**ATTN: Certificate of Correction Branch**  
Commissioner of Patents  
P. O. Box 1450  
Alexandria, VA 22313-1450

**Certificate**  
**MAY 24 2005**  
**of Correction**

S I R:

Pursuant to 35 U.S.C. §254 and MPEP 1480, in order to correct printing errors, Applicant submits herewith for U.S. Patent 6,888,853 an attached Certificate of Correction, which could also be the basis for a corrected patent, based on the discretion of the Patent Office.

On the cover sheet of the patent, a substantial number of U.S. Patent documents, foreign patent documents, and other publications cited by Applicant before the close of prosecution were not listed in the prior art section.

Pursuant to MPEP 1480.01 – Expedited Issuance of Certificates of Correction – Error Attributable to the U. S. Patent Office – please find enclosed herewith as Exhibit A the Examiner's listing on Form PTO-1449 dated January 14, 2003 of the references considered, but which were mistakenly not indicated on the face of the printed '853 patent. Although the references on page 1 of 1 dated January 13 were

**MAY 25 2005**

listed (Exhibit A), the references considered by the Examiner on January 14, 2003 were not included on the cover sheet of the '853 patent.

In the printed drawings, some but not all of the legend translations were shown in the printed patent drawings. This error is corrected by the legends added in the attached Certificate of Correction

As shown by the attached Drawing Correction Letter (Exhibit B) referenced in Applicant's Preliminary Amendment deposited with the U.S. Post Office by Express Mail on March 8, 2001 (Exhibit C) the translation of the German legends on the drawing figures was made. The formal drawings with these changes were sent to the U.S. Patent Office on September 14, 2001 as approved by the Examiner in the Office Action of January 30, 2003 (Exhibit D), except for mis-spellings in Figs 1 and 8). The Examiner also requested that Figures 2 and 2a be labeled "Prior Art". This was done in accordance with new formal drawings sent to the Patent Office, the receipt of which was confirmed by the Examiner in the Office Action of August 13, 2003 (Exhibit E).

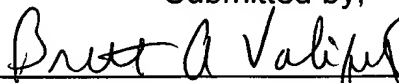

It is noted that the Patent Office has the discretion, pursuant to 35 U.S.C. §254 (MPEP 1480), to issue a corrected patent without charge in lieu of and with like effect as a Certificate of Correction. Because of the numerous printing errors by the Patent Office, the Patent Office should consider a corrected patent in this instance.

If the Examiner has any questions concerning this Certificate of Correction, a telephone interview is suggested with Applicant's attorney.

MAY 25 2005

For convenience, a copy of the cover sheet and all drawing figures for printed  
U.S. Patent 6,888,853 are enclosed.

Submitted by,

(Reg. 27,841)

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

## Disposition of Claims

## **DETAILED ACTION**

### ***Response to Amendment***

In response to the two preliminary amendments, the second substitute specification and abstract has been entered. Claims 1-336 are cancelled and claims 337-407 are added. Claims 337-407 are currently pending.

### ***Drawings***

The proposed drawing correction and/or the proposed substitute sheets of drawings, filed on 14 September 2001 have been approved. The substitute drawing pages incorporating these changes were received on 14 September 2002. These drawings are acceptable except as follows:

The drawings are objected to because of the following:

In Fig. 1, "radiation" is misspelled.

In Fig. *b* "coolant" is misspelled.

Figures 2 and 2a should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g).

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

### ***Claim Objections***

Claim 395 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the

Art Unit: 2828

**DETAILED ACTION**

***Response to Amendment***

In response to the amendment filed 30 June 2003, claims 337, 343, 383, 386, 403, and 406-407 are amended, and claims 408-421 added. Claims 337-421 are currently pending.

***Drawings***

The corrected or substitute drawings were received on 30 June 2003. These drawings are acceptable.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 409-410 and 417-419 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 409 recites the limitation "said processing surface" in line 7. Claim 417 recites the same limitation in lines 7 and 10. There is insufficient antecedent basis for this limitation in these claims. Further, the term "The" at the start of claim 417 should be changed to "A".

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

## CERTIFICATE OF CORRECTION

PATENT NO. : 6,888,853 B1

DATED : May 3, 2005

INVENTOR(S) : Heinrich Jürgensen

It is certified that errors appear in the above-identified patent and that said Letters Patent is hereby corrected as shown below:

In the Patent cover sheet at col. 1 after "References Cited" through col. 2 and before "Primary Examiner – Don Wong" substitute the following to correct errors in the listing of references:

(57) **ABSTRACT**

A system and method for selectively process material on a processing surface of a printing form to create a fine structure or pattern for images or text. At least one fiber laser comprising a pump source and a laser fiber is provided. A laser gun is mounted adjacent the printing form and has at least a focusing optics. The fiber laser outputs a laser beam which is diffraction-limited to permit the focusing optics to focus the laser beam onto the processing surface of the printing form as a spot having a spot size sufficiently small to process the processing surface to create the fine structure or pattern images or text.
